

Sign a referral order sent to you

VPACC staff actively screen Sutter Medical Direct (SMD) and Value-Based (VB) patients that have been diagnosed with Heart Failure with reduced Ejection Fraction (HFrEF). The VPACC staff may outreach to you via EHR in-basket messaging to sign the referral so that these patients can be followed and managed by the Pharmacists.

Step Action Activity:

1. Read the Telephone Encounter message in your In Basket under Patient Call

2. Open telephone encounter
3. Sign the Pended Referral Order
